

Activities on arXiv

- ❖ **arXiv:** repository owned and operated by Cornell
- ❖ Service to our community for immediate dissemination of ideas and results
- ❖ Easily-referable place (with time stamp) for technical reports, manuals and extended versions of our works
- ❖ Venue open to authors uninterested in the peer-review process
- ❖ Zero review process
- ❖ Policy about submission to traditional journals

Systems and Control/ Optimization and Control

- ❖ *Systems and Control* section (under CS) initiated during summer 2010

<http://arxiv.org/corr/home>

- ❖ Moderators: Marco Lovera, Roberto Tempo, Yuan Wang

- ❖ *Optimization and Control* section (under math) initiated by Eduardo Sontag about 10 years ago

<http://arxiv.org/archive/math>

- ❖ Moderators: Marco Lovera, Roberto Tempo, Yuan Wang

Panel on “E-Print Servers and Traditional Publishing” at CDC10

- ❖ Future of **STEM** (Science, Technology, Engineering and Mathematics) publishing and related copyright issues
 - David Forney (IEEE Information Theory Society)
 - Chris Greenwell (Elsevier)
 - Jon Rockne (IEEE Vice President PSPB)
 - David Marshall (SIAM)
 - Simeon Warner (arXiv)
 - Christos Cassandras (IEEE Control Systems Society)
- Panel Moderators: John Baillieul and Roberto Tempo

Perspectives on E-Print Servers and Traditional Publishing

- ❖ Article published in the June issue of IEEE CSM
- ❖ Expanded version with slides of panelists available at

<http://www.ieeecss.org/main/publications/miscellaneous>

- ❖ Policy regarding submissions to arXiv and traditional journals
- ❖ Policy about arXiv abuse

Statistics about Submissions

	cs.SY	math.OC
Aug 10	8	52
Sep 10	8	50
Oct 10	16	58
Nov 10	11	54
Dec 10	9	50
Jan 11	19	56
Feb 11	38	72
Mar 11	59	98
Apr 11	41	66
Total	209	556

Download Statistics for 2010

	cs.SY	math.OC
2010	11357	210147

- ❖ arXiv: 600K articles and 40M downloads
- ❖ average: 67 downloads/article
- ❖ Conjecture by Simeon Warner (based on downloads from institutional servers): the number of downloads from industry in SY and OC is higher than in arXiv (20%-30%)

10 Top Download Institutions for SY+OC

Conclusions

- ❖ CSS publications remain leading sources of information
- ❖ The value that our editorial boards add in terms of peer review is exceptionally high
- ❖ Nevertheless, the WWW and the Internet offer radically new ways of disseminating knowledge
- ❖ We hope that all scholars in our field will explore the opportunities provided by arXiv repositories in the sections
 - **Systems and Control**
 - **Optimization and Control**

Policy about Submissions to arXiv

❖ Elsevier's current policy on electronic preprints:

- ❖ Elsevier does not consider the existence of an electronic preprint of an article as “prior publication”, nor will it require authors to remove electronic preprints of an article from public servers should the article be accepted for publication in an Elsevier journal
- ❖ If a paper posted on a preprints server is accepted for publication in an Elsevier journal, the preprint version may be replaced by an updated author's version of the paper but a link to the journal and a full citation should be included. In line with Elsevier policy the final published version may not be submitted to the preprints server

Policy about Submissions to arXiv

- ❖ IEEE does not have a policy equivalent to that of Elsevier
- ❖ IEEE allows the posting of the final **accepted** version of an article on an author's institutional server, but not the final **published article**. Instead, an author is encouraged to add a link to the final authorized version
- ❖ Details are given in the extensive IEEE PSPB Operations Manual
<http://www.ieee.org/documents/opsmanual.pdf>
- ❖ Posting policies are covered in Section 8.1.9

Policy about Submissions to arXiv

- ❖ SIAM does not have a policy equivalent to that of Elsevier
- ❖ SIAM grants authors “the right to post an electronic version of the final SIAM file of the work on the author's current institutional internet server ...”
- ❖ It does not grant the right to post preprints or the redacted version to their personal website
- ❖ SIAM’S copyright assignment agreement... “in practice... is more flexible”

Policy on arXiv Abuse

- ❖ **Excessive submission rate.** Articles submitted to arXiv must be of refereeable quality, and there is a practical limit to the rate at which appropriate, independent submissions can be produced by any one person. Moderators may request that a particular submitter limit their submission rate if they have a history of many submissions to inappropriate areas or of doubtful refereeability
