

December 2015 Activity Report

From: Zongli Lin, Technical Committee Chair (zl5y@virginia.edu)

Date: October 2015

Summary

A small group of the committee had an informal meeting in St. Petersburg, Russia, in June, during the 1st IFAC Conference on Modelling, Identification and Control of Nonlinear Systems (MICNON-2015). We discussed ideas for promoting nonlinear systems and control both among our research community and our community at large.

During this reporting period, several new members have joined the committee. The roster of the committee members on the TC's website is up to date. A LinkedIn group called "IEEE Nonlinear Systems and Control" was created. Currently, there are 41 members in the group. Committee members continued to be active in their activities that contribute to the mission of the committee. The page EVENTS on the TC website that lists the upcoming conferences and workshops stayed updated.

I will step down as the Chair of the committee in 2016 and will continue to be active as a committee member.
