Novel Stability Conditions for Nonlinear Monotone Systems and Consensus in Multiagent Networks

State Estimation of Continuous-Time Dynamical Systems With Uncertain Inputs With Bounded Variation: Entropy, Bit Rates, and Relation With Switched Systems

Tight Remainder-Form Decomposition Functions With Applications to Constrained Reachability and Guaranteed State Estimation

Optimal Intervention in Transportation Networks

Saturated Feedback Stabilizability to Trajectories for the Schrödinger Parabolic Equation

Exponential Consensus of Multiple Agents Over Dynamic Network Topology: Controllability, Connectivity, and Compactness

Output-Based Dynamic Event-Triggered Control for Networked Control Systems With Delays and Packet Losses Without Acknowledgements

Distributed Range-Only Localization That Preserves Sensor and Navigator Privacies

Distributed Feedback Control of Multichannel Linear Systems

Push–Pull With Device Sampling

Safe PDE Backstepping QP Control With High Relative Degree CBFs: Stefan Model With Actuator Dynamics

A Sampling Control Framework and Its Applications to Robust and Adaptive Control

Asymptotic Theory for Regularized System Identification Part I: Empirical Bayes Hyperparameter Estimator

A Compositional Dissipativity Approach for Data-Driven Safety Verification of Large-Scale Dynamical Systems

Convergence Rate of Accelerated Average Consensus With Local Node Memory: Optimization and Analytic Solutions

Modeling of Low Rank Time Series

Hierarchical Supervisory Control Under Partial Observation: Normality

Observability and Detectability of Stochastic Labeled Graphs
Secure Estimation, Attack Isolation, and Reconstruction Based on Zonotopic Unknown Input Observer ................................................................. H. Liu, Y. Li, Q. -L. Han, T. Raïssi, and T. Chai 7312
Stabilization of Linear Cyber-Physical Systems Against Attacks via Switching Defense ................................................................. S. Liu, S. Martínez, and J. Cortés 7326
Hybrid Feedback for Autonomous Navigation in Planar Environments With Convex Obstacles ................................................................. M. Sawant, S. Berkane, I. Polushin, and A. Tayebi 7342
Algebraic Reduction of Hidden Markov Models ................................................................. T. Grigoletto and F. Ticozzi 7374
Continuous-Observation One-Sided Two-Player Zero-Sum Partially Observable Stochastic Game With Public Actions ................................................................. W. Zheng, T. Jung, and H. Lin 7390
Distributed Channel Access for Control Over Known and Unknown Gilbert–Elliott Channels ................................................................. T. Farjam, H. Wymeersch, and T. Charalambous 7405
On Persistence of Some \( W_1 \)-Endotactic Chemical Reaction Networks .......................................................................................................................... X. Zhang, C. Gao, and D. Dochain 7420
The Gardner Problem on the Lock-In Range of Second-Order Type 2 Phase-Locked Loops ................................................................................................................................. N. V. Kuznetsov, M. Y. Lobachev, M. V. Yuldashev, R. V. Yuldashev, and M. S. Tavazoei 7436
A Lyapunov Function for Robust Stability of Moving Horizon Estimation ................................................................................................................................. J. D. Schiller, S. Muntwiler, J. Köhler, M. N. Zeilinger, and M. A. Müller 7466
LQG Graphon Mean Field Games: Analysis via Graphon-Invariant Subspaces ................................................................................................................................. S. Gao, P. E. Caines, and M. Huang 7482
Stability Verification of Neural Network Controllers Using Mixed-Integer Programming ................................................................................................................................. R. Schwan, C. N. Jones, and D. Kuhn 7514
Safe Exploration and Escape Local Minima With Model Predictive Control Under Partially Unknown Constraints ................................................................................................................................. R. Soloperto, A. Mesbah, and F. Allgöwer 7530
On the Convergence Properties of a Distributed Projected Subgradient Algorithm ................................................................................................................................. W. Li, Z. Chen, Y. Lou, and Y. Hong 7546
Multiagent, Multitarget Path Planning in Markov Decision Processes ................................................................................................................................. F. Nawaz and M. Ornik 7560
Bounding the Distance to Unsafe Sets With Convex Optimization ................................................................................................................................. J. Miller and M. Sznaier 7575
Quantitative Resilience of Generalized Integrators ................................................................................................................................. J.-B. Bouvier, K. Xu, and M. Ornik 7591
Stochastic MPC With Robustness to Bounded Parametric Uncertainty ................................................................................................................................. E. Arcari, A. Iannelli, A. Carron, and M. N. Zeilinger 7601
State-Space Collapse in Resource Allocation for Demand Dispatch and Its Implications for Distributed Control Design ................................................................................................................................. J. Mathias, S. Meyn, R. Moye, and J. Warrington 7616
Global Reachability of Heterogeneous Multiagent Systems Under Collaborative Interaction Topology and Unknown Delays ................................................................................................................................. S. De, S. R. Sahoo, and P. Wahi 7629
Optimal Selection and Tracking Of Generalized Nash Equilibria in Monotone Games ................................................................................................................................. E. Benenati, W. Ananduta, and S. Grammatico 7644
Risk of Phase Incoherence in Wide Area Control of Synchronous Power Networks With Time-Delayed and Corrupted Measurements ................................................................................................................................. C. Somarakis, G. Liu, and N. Motee 7676
Uniformly Bounded State Estimation Over Multiple Access Channels ................................................................................................................................. G. Zafzouf, G. N. Nair, and F. Farokhi 7692
Coevolutionary Dynamics of Actions and Opinions in Social Networks ................................................................................................................................. H. D. Aghbolagh, M. Ye, L. Zino, Z. Chen, and M. Cao 7708
Personalized Incentives as Feedback Design in Generalized Nash Equilibrium Problems ................................................................................................................................. F. Fabiani, A. Simonetto, and P. J. Goulart 7724
Integration of Adaptive Control and Reinforcement Learning for Real-Time Control and Learning ................................................................................................................................. A. M. Annaswamy, A. Guha, Y. Cui, S. Tang, P. A. Fisher, and J. E. Gaudio 7740
Scalable Robust Safety Filter With Unknown Disturbance Set ................................................................................................................................. F. Gruber and M. Althoff 7756
Fully Automated Verification of Linear Systems Using Inner and Outer Approximations of Reachable Sets ................................................................................................................................. M. Wertzlinger, N. Kochdumper, S. Bak, and M. Althoff 7771

(Contents Continued from Page 7025)
Mode-Independent Switching Stabilizing Control for Continuous-Time Linear Markovian Switching Systems ............... S. Cong 8029
$H_{\infty}$ Control of Constrained Markov Jump Systems With Intermittent Mode Information Loss .......................... Y. Shen, Z.-G. Wu, P. Shi, and B. Chen 8052
Network Realization Functions for Optimal Distributed Control ................................................................. Ş. Sabău, A. Sperlăţă, C. Oară, and A. Jadbabaie 8059
Distributed Control of Descriptor Networks: A Convex Procedure for Augmented Sparsity .............................. A. Sperlăţă, C. Oară, B. D. Ciobotaru, and Ş. Sabău 8067
Safe Consensus Tracking With Guaranteed Full State and Input Constraints: A Control Barrier Function-Based Approach .......................................................... J. Fu, G. Wen, and X. Yu 8075
Necessary and Sufficient Conditions for Two Quadratic Equalities to Hold With Applications .......................... T. Zhang and W. Zhang 8082
Emergent Hypotrochoidal and Epitrochoidal Formations in a Swarm of Agents ..................................................... G. Fedele, L. D’Alfonso, and A. Bono 8087
Probabilistic Safety Guarantees for Markov Decision Processes ............................................................................. R. Wisniewski and M. L. Bujorianu 8095
Observation of Periodic Systems: Bridge Centralized Kalman Filtering and Consensus-Based Distributed Filtering ..... J. Qian, Z. Duan, P. Duan, and Z. Li 8103
Robust Stability Analysis of Sampled-Data Systems With Uncertainties Characterized by the $L_{\infty}$-Induced Norm: Gridding Treatment With Convergence Rate Analysis ...................................................... D. Kwak, J. H. Kim, and T. Hagishawa 8119
Distributed Multiproximal Algorithm for Nonsmooth Convex Optimization With Coupled Inequality Constraints ................................................................................................................. Y. Huang, Z. Meng, J. Sun, and W. Ren 8126
On Stabilizing Communication Law for Bilateral Teleoperations ............................................................................. H. D. Tho and T. Miyoshi 8134
Event-Triggered Adaptive Control for a Class of Nonlinear Systems With Mismatched Uncertainties via Intermittent and Faulty Output Feedback ........................................................................ Z. Zhang, C. Wen, L. Xing, and Y. Song 8142
Intermittent Static Output Feedback Control for Stochastic Delayed-Switched Positive Systems With Only Partially Measurable Information ................................................................. K. Ding and Q. Zhu 8150
Critical Observability Verification and Enforcement of Labeled Petri Nets by Using Basis Markings ......................... X. Cong, M. P. Fanti, A. M. Mangini, and Z. Li 8158
Local Output Feedback Stabilization of a Nonlinear Kuramoto–Sivashinsky Equation ................................................. H. Lhachemi 8165
Speeding-Up Backpropagation of Gradients Through the Kalman Filter via Closed-Form Expressions ......................... C. Parellier, A. Barrau, and S. Bonnabel 8171
Convergence to Zero of Quadratic Lyapunov Functions for Multiagent Systems in Time-Varying Directed Networks .... B. Wang, Y.-P. Tian, and Z. Han 8178
Convergence Analysis and Strategy Control of Evolutionary Games With Imitation Rule on Toroidal Grid ............... G. Chen and Y. Yu 8185
Luenberger-Like Observer Design and Optimal State Estimation of Logical Control Networks With Stochastic Disturbances ........................................................................................................ Y. Li, H. Li, and G. Xiao 8193
Event-Based Model Reference Adaptive Tracking .............................................................................................. Y. Wang, C. Wen, and X. Li 8201
Prescribed-Time Synchronization of Multileveled and Directed Complex Networks ................................................. L. Xu and X. Liu 8208
Adaptive Quantized Output Feedback Control of Nonlinear Systems With Mismatched Uncertainties and Sensor Failures ........................................................................................................... Z. Zhang, C. Wen, Y. Song, and G. Feng 8216
Control Design for a Class of Discrete-Time Port-Hamiltonian Systems ............................................................ A. Macchelli 8224
Exploiting Term Sparsity in Moment-SOS Hierarchy for Dynamical Systems ......................................................... J. Wang, C. Schlosser, M. Korda, and V. Magron 8232
Pisot-Number-Based Discrete-Time Controllers With Integer State Matrices to Ensure Monotonic Closed-Loop Step Responses ........................................................................................... M. S. Tavazoei 8238
Distributed Unknown Input Observer ................................................................................................................ G. Cao and J. Wang 8244
Insights From Robust Control Theory Into the Synchronization of Multiagent Systems ............................................. F. H. D. Guaracy and L. H. C. Ferreira 8252
Observer-Based Sensor Fault-Tolerant Control With Prescribed Tracking Performance for a Class of Nonlinear Systems

H. Habibi, A. Yazdani, M. Darouach, H. Wang, T. Fernando, and I. Howard 8259

Model Reduction by Least Squares Moment Matching for Linear and Nonlinear Systems

A. Padoan 8267

Reformulation of Matching Equation in Potential Energy Shaping

PAPERS

Robustness of Synchronization With Heterogeneous Self-Dynamics and Interactions, S. Rakshit and F. Pasqualetti................................................................. pp. 3259-3264.

A Distributed Design and Plug-n-Play Algorithm for Consensus of Constrained Networks, S. Manfredi ........................................................................................................ pp. 3301-3306.

An Approach to Consensus-Based Time Synchronization Based on Dynamic Consensus, A. Bathelt ........................................................................................................ pp. 3319-3324.

Sufficient Conditions for Stabilizability by Discrete-Time Controllers Possessing Monic Characteristic Polynomials With Integer Coefficients, M. S. Tavazoei ........................................................................................................ pp. 3337-3342.

Data-Driven Computation of Robust Invariant Sets and Gain-Scheduled Controllers for Linear Parameter-Varying Systems, M. Mejari, A. Gupta and D. Piga ........................................................................................................ pp. 3355-3360.
Guaranteed Stabilization and Safety of Nonlinear Systems via Sliding Mode Control, F. Ding, J. Ke, W. Jin, J. He and X. Duan ........................................................................................................... pp. 3367-3372.
Computationally Efficient Data-Driven Discovery and Linear Representation of Nonlinear Systems for Control, M. Tiwari, G. Nehma and B. Lusch ............................................................................................................. pp. 3373-3378.
Bounded Output Feedback Control of Planar Systems With Unknown Nonlinear Structures and Application to Output Consensus, C. -C. Chen, S. He and C. Qian ............................................................................................................. pp. 3379-3384.
Consensus Sets Based on Sarymsakov Matrices, S. -P. Hsu ............................................................................................................. pp. 3397-3402.

Special Section on Multi-Agent Coordination for Energy Systems: From Model Based to Data-Driven Methods
Guest Editors:
Luigi Glielmo, University of Sannio, Benevento, Italy
Sergio Grammatico, T. U. Delft, Netherlands
Hamed Kebriaei, University of Tehran, Iran
Roy S. Smith, ETH Zurich, Switzerland

Guest Editorial Introduction to the IEEE Control Systems Letters Special Section on Multi-Agent Coordination for Energy Systems: From Model Based to Data-Driven Methods, L. Glielmo et al.............. pp. 3415-3416.
Distributed Energy Resource Management: All-Time Resource-Demand Feasibility, Delay-Tolerance, Nonlinearity, and Beyond, M. Doostmohammadian ............................................................................................................. pp. 3423-3428.
Generalized Stochastic Dynamic Aggregative Game for Demand-Side Management in Microgrids With Shared Battery, S. Yadollahi, H. Kebriaei and S. Soudjani .......................................................... pp. 3429-3434.
Energy Based Cooperative Distributed MPC for Frequency Control in Microgrids, T. de Jong and M. Lazar ............................................................................................................. pp. 3441-3446.
Data-Driven Control: Part Two of Two
Hot take: Why not go with models?
FLORIAN DÖRFLER

The Informativity Approach
To data-driven analysis and control
HENK J. VAN WAARDE, JAAP EISING, M. KANAT CAMLIBEL,
and HARRY L. TRENTELMAN

Statistical Learning Theory for Control
A finite-sample perspective
ANASTASIOS TSIAMIS, INGVAR ZIEMANN, NIKOLAI MATNI,
and GEORGE J. PAPPAS

AutoDDC
Hyperparameter tuning for direct data-driven control
VALENTINA BRESCHI and SIMONE FORMENTIN
MISSION STATEMENT AND SCOPE: As the official means of communication for the IEEE Control Systems Society, *IEEE Control Systems* publishes interesting, useful, and informative material on all aspects of control system technology for the benefit of control educators, practitioners, and researchers. With this mission statement in mind, *IEEE Control Systems* encourages submissions, both feature articles and columns, on all aspects of control system technology.

SUBMISSION OF MANUSCRIPTS: A feature article typically provides an in-depth treatment of either an application of control technology, a tutorial on some area of control theory, or an innovation in control education. *IEEE Control Systems* publishes a variety of columns. “Applications of Control” columns are industrially oriented summaries of innovations in control technology. “Focus on Education” typically describes some aspect of education such as novel control experiments. “Lecture Notes” can be theoretical in nature as long as they have clear tutorial value and intent. See recent issues for examples of these and other types of columns. Authors are encouraged to contact the editor-in-chief about the suitability of potential columns.

A detailed Author’s Guide, a sample formatted manuscript, and LATEX template can be found at http://ieeecss.org/publication/ieee-control-systems-magazine. The specifications in this guide should be followed by all submissions.

All manuscripts should be submitted electronically to the *IEEE Control Systems* website, https://css.paperplaza.net/conferences/scripts/start.pl, with inquiries on appropriateness of content e-mailed to r.sepulchre@eng.cam.ac.uk.

SPECIAL ISSUES: *IEEE Control Systems* encourages proposals for special issues. Proposers are encouraged to contact the editor-in-chief to discuss potential topics.

BOOKS AND CONFERENCES: Submit information about past and future conferences to the corresponding editor for conferences.

ADVERTISING: *IEEE Control Systems* accepts advertising for educational products, books, software, conferences, employment, and control-related technology. For information about advertising, contact Mark David, m.david@ieee.org, +1 732 465 6473.

IEEE CONTROL SYSTEMS—ISSN 1066-033X (ISMAD7) is published bimonthly by The Institute of Electrical and Electronics Engineers, Inc. Headquarters: 3 Park Avenue, 17th Floor, New York, NY 10016, U.S.A. +1 212 419 7900. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society, or its members. Authors must certify, by signature on the copyright transfer agreement, that the article is original and has not been published elsewhere. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society, or its members. To order individual copies for members and nonmembers, please e-mail the IEEE Contact Center at contactcenter@ieee.org. Member and nonmember subscription prices available on request. Copyright and Reprint Permissions: Abstracting is permitted with credit to the source. Libraries are permitted to photocopy beyond the limits of the U.S. Copyright law for private use of patrons: 1) those post-1977 articles that carry a code at the bottom of the first page, provided the per-copy fee indicated in the code is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, U.S.A., and 2) pre-1978 articles without fee.
