REGULAR PAPERS

Duality for Nonlinear Filtering II: Optimal Control ............................................ J. W. Kim and P. G. Mehta 712
Online Guaranteed Reachable Set Approximation for Systems With Changed Dynamics and Control Authority ................. H. El-Kebir, A. Pirozmannishvili, and M. Ornik 726
On the Inherent Distributional Robustness of Stochastic and Nominal Model Predictive Control ........................................... R. D. McAllister and J. B. Rawlings 741
Scalable Computation of Robust Control Invariant Sets of Nonlinear Systems ........ L. Schäfer, F. Gruber, and M. Althoff 755
Distributed Saturated Impulsive Control for Local Consensus of Nonlinear Time-Delay Multiagent Systems With Switching Topologies ........................................ X. Lv, J. Cao, L. Rutkowski, and P. Duan 771
Monotone One-Port Circuits ........................................................................... T. Chaffey and R. Sepulchre 783
High-Confidence Data-Driven Ambiguity Sets for Time-Varying Linear Systems .............................................................. D. Boskos, J. Cortés, and S. Martínez 797

A Robust Approach to ARMA Factor Modeling ................................................ L. Falconi, A. Ferrante, and M. Zorzi 828
Quantum Coherent Feedback Control With Photons ....................................... H. Ding and G. Zhang 856
Tailoring Gradient Methods for Differentially Private Distributed Optimization ................................................................. Y. Wang and A. Nedić 872
Robust Cooperative Output Regulation for Networks of Hyperbolic PIDE–ODE Systems ......................................................... J. Gabriel and J. Deutscher 888
A Stochastic Hybrid Framework for Event-Triggered Nonlinear Control Systems With Stochastic Denial of Service Attacks .................................................................................. K.-Z. Liu, A. R. Teel, and X.-M. Sun 904
On the Optimization Landscape of Dynamic Output Feedback Linear Quadratic Control ......................................................... J. Duan, W. Cao, Y. Zheng, and L. Zhao 920
Online Distributed Stochastic Gradient Algorithm for Nonconvex Optimization With Compressed Communication .................. J. Li, C. Li, J. Fan, and T. Huang 936

Nongradient-Based Tracking of Environmental Field Isolines in a Changing Medium by Dubins-Vehicle Type Robots .......... A. S. Matveev, I. Berman, A. Bugrova, M. Bystramovich, A. Kapitonov, and V. Manaenko 952
Cooperative Multiagent Reinforcement Learning With Partial Observations ................................................................. Y. Zhang and M. M. Zavlanos 968
Contraction Analysis of Discrete-Time Stochastic Systems ........................................ Y. Kawano and Y. Hosoe 982

(Contents Continued from Back Cover)
A Specified-Time Convergent Multiagent System for Distributed Optimization With a Time-Varying Objective Function .......................... Y. Zheng, Q. Liu, and J. Wang 1257

Decentralized Intermittent Feedback Adaptive Control of Non-Triangular Nonlinear Time-Varying Systems .................................................. L. Sun, X. Huang, and Y. Song 1265

Dynamic Programming Principle for Automatic Negotiations .......................................................... K. S. Phogat and K. Tsumura 1281

Polarization of Multi-agent Gradient Flows Over Manifolds With Application to Opinion Dynamics .......................................................... L. Mi, J. Gonçalves, and J. Markdahl 1288

Prediction for Dynamic Systems Using Impulse Response Representation ........ T. L. Vincent, S. Yan, and E. Bitar 1296

Identifiability of Dynamic Networks: The Essential Rôle of Dources and Dinks .......................................................... E. Mapurunga, M. Gevers, and A. S. Bazanella 1303

Two-Step Stackelberg Approach for the Two Weak Pursuers and One Strong Evader Closed-Loop Game .......................................................... P. Zhang and Y. Zhang 1309

On Exact Embedding Framework for Optimal Control of Markov Decision Processes .......................................................... S. Kharade, S. Sutavani, A. Yerudkar, S. Wagh, Y. Liu, C. Del Vecchio, and N. M. Singh 1316

Distance-Based Formation Tracking of Single- and Double-Integrator Agents .......................................................... H. M. Vu, M. H. Trinh, Q. Van Tran, and H.-S. Ahn 1332

Observability Decomposition of Boolean Control Networks Under Several Kinds of Observability .......................................................... Y. Li, J.-E Feng, D. Cheng, and Y. Jia 1340

Bumpless Transfer Model Predictive Control for Markov Jump Linear Systems .......................................................... T. Wu, Y. Zhu, L. Zhang, and P. Shi 1348

Structured, Reduced-Order $H_2$-Conic Control .......................................................... E. J. LoCicero and L. J. Bridgeman 1356

Mean Square Exponential Stabilization of Sampled-Data Systems Subject to Actuator Nonlinearities, Random Sampling, and Packet Dropouts .......................................................... D. D. Huff, M. Fiacchini, and J. M. Gomes da Silva Jr 1364

A Note on the Smallest Eigenvalue of the Empirical Covariance of Causal Gaussian Processes .......................................................... I. Ziemann 1372

Fully Distributed Algorithms for Constrained Nonsmooth Optimization Problems of General Linear Multiagent Systems and Their Application .......................................................... Z. Deng and J. Luo 1377
IEEE CONTROL SYSTEMS LETTERS
A PUBLICATION OF THE IEEE CONTROL SYSTEMS SOCIETY

2024 VOLUME 8 NUMBER 1 (PAPERS from 1 to 21)

PAPERS

Bootstrapped Gaussian Mixture Model-Based Data-Driven Forward Stochastic Reachability Analysis, J. Choi, H. Park and I. Hwang .................................................................................................................. pp. 1-6

A Neural-Lyapunov-Based Adaptive Resilient Cruise Control of Platoons Subject to Cyber-Attacks on Leaders, L. Khoshnevisan and X. Liu .............................................................................................................. pp. 7-12

Dynamic Adaptation Gains for Nonlinear Systems With Unmatched Uncertainties, B. T. Lopez and J. J. Slotine ........................................................................................................................................... pp. 31-36

Safe Motion Planning for Serial-Chain Robotic Manipulators via Invariant Sets, T. Brandt, R. Fierro and C. Danielson ........................................................................................................................................... pp. 49-54

Rates of Convergence in a Class of Native Spaces for Reinforcement Learning and Control, A. Boulard, S. Niu, S. T. Paruchuri, A. Kurdila, J. Burns and E. Schuster .............................................................................................................. pp. 55-60

Minimal Gelbrich Distance to Uncorrelation, M. Borelle, T. Alamo, C. Stoica, S. Bertrand and E. F. Camacho ........................................................................................................................................... pp. 61-66

Experimental Modeling and Variable Structure Control for Cyborg Cockroaches, A. Cafforio, E. Punta and K. Morishima ........................................................................................................................................... pp. 67-72

Linear Time-Varying Parameter Estimation: Maximum A Posteriori Approach via Semidefinite Programming, S. Vakili, M. Khosravi, P. M. Esfahani and M. Mazo .............................................................................................................. pp. 73-78

Optimality of POD for Data-Driven LQR With Low-Rank Structures, R. Newton, Z. Du, P. Seiler and L. Balzano ........................................................................................................................................... pp. 85-90

Lyapunov-Based Long Short-Term Memory (Lb-LSTM) Neural Network-Based Adaptive Observer, E. J. Griffis, O. S. Patil, R. G. Hart and W. E. Dixon .............................................................................................................. pp. 97-102

Robust Control Barrier Functions for Sampled-Data Systems, P. S. Oruganti, P. Naghizadeh and Q. Ahmed ........................................................................................................................................... pp. 103-108
Average Consensus With Error Correction, D. R. Benalcazar, S. Magnússon and C. Enyioha. pp. 115-120
20 Mechanism Design Theory in Control Engineering
A Tutorial and Overview of Applications in Communication, Power Grid, Transportation, and Security Systems
IOANNIS VASILEIOS CHREMOS and ANDREAS A. MALIKOPOULOS

46 Model-Based Control of the Scanning Tunneling Microscope
Enabling New Modes of Imaging, Spectroscopy, and Lithography
HAMED ALEMANSOUR and S. O. REZA MOHEIMANI

LECTURE NOTES
Lyapunov Equations: A (Fixed) Point of View
MISSION STATEMENT AND SCOPE: As the official means of communication for the IEEE Control Systems Society, IEEE Control Systems publishes interesting, useful, and informative material on all aspects of control system technology for the benefit of control educators, practitioners, and researchers. With this mission statement in mind, IEEE Control Systems encourages submissions, both feature articles and columns, on all aspects of control system technology.

SUBMISSION OF MANUSCRIPTS: A feature article typically provides an in-depth treatment of either an application of control technology, a tutorial on some area of control theory, or an innovation in control education. IEEE Control Systems publishes a variety of columns. "Applications of Control" columns are industrially oriented summaries of innovations in control technology. “Focus on Education” typically describes some aspect of education such as novel control experiments. “Lecture Notes” can be theoretical in nature as long as they have clear tutorial value and intent. See recent issues for examples of these and other types of columns. Authors are encouraged to contact the editor-in-chief about the suitability of potential columns.

A detailed Author’s Guide, a sample formatted manuscript, and LATEX template can be found at http://ieeecss.org/publication/ieee-control-systems-magazine. The specifications in this guide should be followed by all submissions.

All manuscripts should be submitted electronically to the IEEE Control Systems website, https://css.paperplaza.net/conferences/scripts/start.pl, with inquiries on appropriateness of content e-mailed to r.sepulchre@eng.cam.ac.uk.

SPECIAL ISSUES: IEEE Control Systems encourages proposals for special issues. Proposers are encouraged to contact the editor-in-chief to discuss potential topics.

BOOKS AND CONFERENCES: Submit information about recently published books to the associate editor for book reviews. Submit information about past and future conferences to the corresponding editor for conferences.

ADVERTISING: IEEE Control Systems accepts advertising for educational products, books, software, conferences, employment, and control-related technology. For information about advertising, contact Mark David, m.david@ieee.org, +1 732 465 6473.

IEEE PROHIBITS DISCRIMINATION, HARASSMENT, AND BULLYING. For more information, visit https://www.ieee.org/nondiscrimination.
