REGULAR PAPERS

Exact Instability Margin Analysis and Minimum-Norm Strong Stabilization—Phase Change Rate Maximization .
S. Hara, C.-Y. Kao, S. Z. Khong, T. Iwasaki, and Y. Hori 2084

Data-Driven Stochastic Optimal Control With Safety Constraints Using Linear Transfer Operators .
U. Vaidya and D. Tellez-Castro 2100

Event-Triggered Reference Governors for Collisions-Free Leader–Following Coordination Under Unreliable Communication Topologies .
L. An, G.-H. Yang, C. Deng, and C. Wen 2116

Dynamic Coverage Control for Constrained Mobile Sensor Networks .
P. Peng, Z. Zhang, and Y. Song 2131

Second-Order Mirror Descent: Convergence in Games Beyond Averaging and Discounting .
B. Gao and L. Pavel 2143

S. Zhu, J. Lu, D. W. C. Ho, and J. Cao 2158

Finite-Horizon Optimal Control for Linear and Nonlinear Systems Relying on Constant Optimal Costate .
L. Tarantino, M. Sassano, S. Galeani, and A. Astolfi 2174

Convergence in High Probability of Distributed Stochastic Gradient Descent Algorithms .

Gain-Scheduling Controller Synthesis for Nested Systems With Full Block Scalings .
C. A. Rössinger and C. W. Scherer 2205

An Incremental Input-to-State Stability Condition for a Class of Recurrent Neural Networks .
W. D’Amico, A. La Bella, and M. Farina 2221

On a Strong Robust-Safety Notion for Differential Inclusions .
M. Maghenem and D. Karaki 2237

Data-Driven Actuator Allocation for Actuator Redundant Systems .
F. Fotiadis, K. G. Vamvoudakis, and Z.-P. Jiang 2249

On the Arithmetic and Geometric Fusion of Beliefs for Distributed Inference .
M. Kayalp, Y. İnan, E. Telatar, and A. H. Sayed 2265

M. Baranwal, P. Budhraja, V. Raj, and A. R. Hota 2281

Optimal Fault Detection for Stochastic Linear Time-Varying Systems by $\chi^2$ Test .
Y. Niu, L. Sheng, M. Gao, and D. Zhou 2294

Can Competition Outperform Collaboration? The Role of Misbehaving Agents .
L. Ballotta, G. Como, J. S. Shamma, and L. Schenato 2308

On the Local Linear Rate of Consensus on the Stiefel Manifold .
S. Chen, A. Garcia, M. Hong, and S. Shahrampour 2324

Time-Domain Sensitivity of the Tracking Error .

(Contents Continued on Back Cover)
Exponential Stability of Stochastic Nonlinear Delay Systems Subject to Multiple Periodic Impulses ................................................. H. Xu, Q. Zhu, and W. X. Zheng 2621
Adaptive Output Synchronization for a Class of Uncertain Nonlinear Multi-Agent Systems Over Switching Networks ......................... J. Huang 2645
Optimal Tracking of Networked Control Systems Over the Fading Channel With Packet Loss ..................................................... X. Jiang, H. Yan, B. Li, S. Zheng, T. Huang, and P. Shi 2652
On Robust Observer Design for a Class of Time-Varying Continuous-Time and Discrete-Time Persidskii Systems ......................... A. Khalin, D. Efimov, and R. Ushirobira 2660
Fault-Tolerant Control for Flexible Structures With Partial Output Constraint ........................................... Z. Han, Z. Liu, J.-W. Wang, and W. He 2668
Optimal Fixed-Time Sliding Mode Control for Spacecraft Constrained Reorientation .......................................................... B. Li, T. Guan, X. Guan, K. Zhang, and K.-F. C. Yiu 2676
Extended Observer Forms for Submersive Discrete-Time Systems .............................................................. A. Simha, V. Kaparin, T. Mullari, and Ü. Kotta 2684
Adaptive Output Tracking for 1-D Wave Equations Subject to Unknown Harmonic Disturbances .............................................. X.-H. Wu and J.-M. Wang 2689
Generalized Dixon Resultant for Strong Delay-Independent Stability of Linear Systems With Multiple Delays ................................. J. Cai, Q. Gao, Y. Liu, and A. Wu 2697
Synthesizing Control Barrier Functions With Feasible Region Iteration for Safe Reinforcement Learning ........................................ Y. Yang, Y. Zhang, W. Zou, J. Chen, Y. Yin, and S. Eben Li 2713
Robust Adaptive Iterative Learning Control for a Generic Class of Uncertain Non-Square MIMO Systems ........................................ X. Li and Z. Hou 2721
Design of Infinite-Dimensional Observers for a Linearized Water Wave System With Distributed or Point Measurement ......................................................................................................................................... Y. Yu, C.-Z. Xu, and J. Yu 2729
Distributed Cooperative Optimization for Nonlinear Heterogeneous MASs Under Intermittent Communication ........................................ C. Deng, L. Xu, T. Yang, D. Yue, and T. Chai 2737
Further Results on the Control Law via the Convex Hull of Ellipsoids ............................................................................................... H.-N. Nguyen 2753
A New Zero-Order Algorithm to Solve the Maximum Hands-Off Control ..................................................................................... H. Mai and Z. Yin 2761
Asymptotical Controllability of Continuous-Time Probabilistic Logic Control Systems ......................................................... Z. Li, Y. Guo, and W. Gui 2769

New Associate Editors
MISSION STATEMENT AND SCOPE: As the official means of communication for the IEEE Control Systems Society, IEEE Control Systems publishes interesting, useful, and informative material on all aspects of control system technology for the benefit of control educators, practitioners, and researchers. With this mission statement in mind, IEEE Control Systems encourages submissions, both feature articles and columns, on all aspects of control system technology.

SUBMISSION OF MANUSCRIPTS: A feature article typically provides an in-depth treatment of either an application of control technology, a tutorial on some area of control theory, or an innovation in control education. IEEE Control Systems publishes a variety of columns. “Applications of Control” columns are industrially oriented summaries of innovations in control technology. “Focus on Education” typically describes some aspect of education such as novel control experiments. “Lecture Notes” can be theoretical in nature as long as they have clear tutorial value and intent. See recent issues for examples of these and other types of columns. Authors are encouraged to contact the editor-in-chief about the suitability of potential columns.

A detailed Author’s Guide, a sample formatted manuscript, and LATEX template can be found at http://ieeecss.org/publication/ieee-control-systems-magazine. The specifications in this guide should be followed by all submissions.

All manuscripts should be submitted electronically to the IEEE Control Systems website, https://css.paperplaza.net/conferences/scripts/start.pl, with inquiries on appropriateness of content e-mailed to r.sepulchre@eng.cam.ac.uk.

SPECIAL ISSUES: IEEE Control Systems encourages proposals for special issues. Proposers are encouraged to contact the editor-in-chief to discuss potential topics.

BOOKS AND CONFERENCES: Submit information about recently published books to the associate editor for book reviews. Submit information about past and future conferences to the corresponding editor for conferences.

ADVERTISING: IEEE Control Systems accepts advertising for educational products, books, software, conferences, employment, and control-related technology. For information about advertising, contact Mark David, m.david@ieee.org, +1 732 465 6473.
